Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The word "preferably" renders the scope of the claims vague and indefinite, since it is not clear whether the corresponding limitations are required.

The Drawing and specification are objected to under 37 CFR 1.84 (u) (1) in referring to the sole figure as "Figure 1".

The specification is objected to in failing to include a "Brief Description of Drawings".

Claims 1-3 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Bexton (US 5,571,303) discloses a process for producing a sulfur-based fertilizer wherein streams of ammonia, phosphoric acid and an aqueous liquid are mixed and reacted to form a liquid reaction mixture, and then a stream of molten sulfur is mixed with the liquid reaction mixture. (See col. 2, lines 38-58 and col. 7, lines 34-56.) However there is no teaching, disclosure or suggestion in Bexton to introduce the elemental sulfur to the reactor substantially at the same time as the other reactants, as required by applicants' claims. Nor would there be any motivation from the prior art to do so. Applicants' specification discloses on page 3, lines 21-33 that a disadvantage of the Bexton process is that due to the performing of ammonium phosphate either much

water is needed to keep the salt dissolved or, when relatively small amounts of water are used, solid ammonium phosphate bis formed, and that the homogenous distribution of sulphur throughout the granule may be hampered by the existence of solid ammonium phosphate.
